                                                                                                                                       AC073228 153185 bp DNA linear HTG 02-, Homo sapiens chromosome 11 clone RP11-660B16, WORKING DRAFT SOCIENCE, 40 unordered pieces.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           NOTE: This is a 'working draft' sequence. It currently consists of 40 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequencing vector: plasmid; 0% Chemistry: Dye-primer ET; 100% of reads Chemistry: Dye-terminator Big Dye; 0% of reads Chemistry: Dye-terminator Big Dye; 0% of reads Assembly program: Phrap; version 0.990319

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 10, Application US/09564805
Patent No. 633403
GENERAL INFORMATION; Sean V.
APPLICANT: Teng, David H.F.
APPLICANT: Simrad, Jacques
APPLICANT: Rommens, Johanna M.
APPLICANT: Myriad Genetics, Inc.
TITLE OF INVENTION: Chromosome 17p-Linked Prostate Cancer Susceptibility
TITLE OF INVENTION: Gene and a Paralog and Orthologous Genes
FILE REFERENCE: 2318-258
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1959 TTTCAGACCTGTCTGGTGCGGCACTGCAAGCATGCGTTTGGCTGTGCGCTGGTGCACACC 2018

Sequence 3, Application US/0998687

Sequence 3, Application US/0998687

GENERAL INPORMATION:
APPLICANT: Tartigian, Sean V.
APPLICANT: Tartigian, Sean V.
APPLICANT: Targ, David H.F.
APPLICANT: Sharatd, Jacques
APPLICANT: Myriad Genetics, Inc.
TITLE OF INVENTION: Chromosome 17p-Linked Prostate Cancer Susceptibility
TITLE OF INVENTION: Gene and a Paralog and Orthologous Genes
FILE REFRENCE: 2318-258
CURRENT APPLICATION NUMBER: 105/09/988,687

CURRENT FILING DATE: 2001-11-20

PRIOR APPLICATION NUMBER: 09/564,805

PRIOR APPLICATION NUMBER: 09/564,805

PRIOR APPLICATION NUMBER: 09/434,382

                                                                                                                                                                                                                                                                                                      Sequence 225, Application US/09988626

Publication No. US20030044959A1

GENERAL INFORMATION:

APPLICANT: Tavtigian, Sean V.

APPLICANT: Tavtigian, Sean V.

APPLICANT: Simard, Jacques

APPLICANT: Somens, Johanna M.

APPLICANT: Myriad Genetics, Inc.

TITLE OF INVENTION: Chromosome 17p-Linked Prostate Cancer Susceptibility

TITLE OF INVENTION: Gene and a Paralog and Orthologous Genes

FILE REFERENCE: 2318-258

CURRENT APPLICATION NUMBER: US/09/988,626

FRICH REPLIANT FILING DATE: 2001-11-20

PRIOR FILING DATE: 1999-11-06

PRIOR FILING DATE: 1999-11-06

Sequence 225, Application US/09988687

Sequence 225, Application US/09988687

GENERAL INFORMATION:

APPLICANT: Tavigian, Sean V.

APPLICANT: Tavigian, Jacques

APPLICANT: Timed, Jacques

APPLICANT: Rommens, Johanna M.

TITLE OF INVENTION: Chromosome 170-Linked Prostate Cancer Susceptibility

TITLE OF INVENTION: Gene and a Paralog and Orthologous Genes

FILE REFERENCE: 2318-258

CURRENT APPLICATION NUMBER: US/09/988,687

CURRENT PILING DATE: 2001-11-20

PRIOR APPLICATION NUMBER: 09/64,805

PRIOR APPLICATION NUMBER: 09/64,805

PRIOR PLILING DATE: 1998-11-06

PRIOR FILING DATE: 1998-11-06

PRIOR FILING DATE: 1999-11-05
